PREFACE

CINL, the original index for the nursing profession, in its twenty-second volume (1977) expanded its coverage of allied health journals. The addition of selected journals for allied health professionals brings the total number of journals currently indexed in this widely used reference tool to over 250 journals. Today's multidisciplinary team approach to the delivery of health care for the patient as a whole person, makes this continuous expansion imperative.

CINL's new title is the CUMULATIVE INDEX TO NURSING & ALLIED HEALTH LITERATURE — CINAHL for short.

CINAHL offers an easy-to-find and easy-to-read authoritative subject-author reference to a broad selection of subject matter of importance to progressive nurses and related health professionals as found in current periodicals and serials.

CINAHL is the only index to nursing periodical literature for the years 1960-1965.

CINAHL indexes all nursing periodicals in the English Language as well as selected periodicals for the following allied health professions:

Cardiopulmonary Technology
Health Education
Laboratory Technology
Medical Assistant
Medical Records
Occupational Therapy
Physical Therapy & Rehabilitation
Radiologic Technology
Respiratory Therapy
Social Service in Health Care

CINAHL indexes selectively for the nurse and related health professionals from popular magazines and biomedical journals. The majority of the biomedical citations are from journals currently indexed in Index Medicus and obtained through SDILINE.

CINAHL, since early 1967 and the inception of the National League for Nursing's Standing Publications Service, indexes all serials published by the League.

CINAHL indexed the American Nurses' Association Subscription Service from February 1968-January 1970 when the Service was discontinued by the Association. CINAHL resumed indexing of ANA publications in 1976.

CINAHL, beginning with the 1970 Cumulation, lists all ancillary journals scanned, giving dates for articles indexed.

CINAHL, beginning with the 1972 Cumulation, includes journals of state nursing organizations.

CINAHL is also a guide to audio-visual materials, book reviews, and pamphlets.

CRITERIA FOR SELECTION OF MATERIALS

- A. Articles from nursing and allied health journals which meet the following criteria:
 - Original, signed, substantive articles and selected unsigned articles pertinent to nurses and allied health professionals.
 - Editorials of national and international scope and editorials.
 - Biographies and obituaries with substantive background materials. Reports about outstanding nurses and allied health professionals of national or international interest, including presidents of state organizations. See Name Section
 - Reports of national and international organizations and conventions which have comprehensive nursing or allied health professional information or content.
 - Important national legislation regarding basic changes pertinent to nursing or allied health professionals or to major health plans.
 - Poetry, if considered pertinent to nursing or allied health.
- B. Articles from medical science journals, as well as certain periodical literature containing articles pertinent to CINAHL users which meet the following criteria:
 - 1. Articles with nursing or allied health content.
 - Articles which, in the judgment of experienced indexers, contain materials pertinent to nurses and allied health professionals.

- C. All serials published by the American Nurses' Association; the National League for Nursing, and the United States Department of Health and Human Services, Division of Nursing.
- D. Audio-visual materials, book reviews, and pamphlets as listed in the journals indexed. See appendix.
- E. Types of materials not included in the Index:
 - Information of dated or transient nature, e.g. notices of forthcoming meetings, etc.
 - News items, abstracts, briefs, summaries and letters to the editor.
 - Financial reports, election details, committee activities, resolutions and bylaws of national, international and local associations.
 - Reprints of materials, except those in <u>Nursing Digest</u> and foreign journals.
 - 5. Editorials of local interest.
 - 6. Promotional, parochial or secular articles.
 - Question and Answer columns diversified in content.
 Question and Answer columns of a comprehensive nature may appear as Regular Column entries.

HOW TO USE THE INDEX

The CUMULATIVE INDEX TO NURSING & ALLIED HEALTH LITERATURE is a subject-author (or name) index. Subjects and authors are arranged together alphabetically in Volumes 1 through 11. Beginning with 1967, Volume 12, subjects and authors are arranged separately. The name section follows the subject section and includes entries for authors, biographees, and the deceased. Entries for biographees and obituaries are enclosed in parentheses.

Frequently subject headings are divided, as: RESPIRATORY THERAPY -- EDUCATION

Ample use of "See" and "See also" references guide the user, as:

Assessment See: DIAGNOSIS; DIAGNOSIS, PSYCHOSOCIAL

Pertinent cross references are repeated in each annual volume even though no entry for the specific subject may be found in that particular volume. In this way the searcher is directed to other annual cumulations as well as to the current bimonthly issues, which do not include the cross references. Effective use of the INDEX requires use of the annual volumes.

The Subject Heading List or thesaurus, which appears in the annual cumulation beginning 1971, Volume 16, is an important and useful quality. A helpful feature in the yellow-page section is the listing each year of New Subject Headings as well as Deleted Subject Headings, followed by the headings under which material was previously indexed.

The indexers assign as many subject headings as are necessary to give in-depth coverage of each article.

Example: An article by N. M. Isaacs, titled:

The treatment of acute spinal cord injury using local hypothermia (Isaacs NM) (pictorial) J NEUROSURG NURS 10: 95-101, Sep 78

Citations are placed under five subject headings:

HYPOTHERMIA, INDUCED MOTOR ACTIVITY ORTHOPEDIC EQUIPMENT SPINAL CORD-INJURIES STEROIDS

Beginning with 1967, Volume 12, subject heading entries are arranged alphabetically by the journal title. The name of the first author appears in parentheses after the title, followed by the title of the periodical, the volume number, page numbers, and date of publication.

Example:

PHYSICAL THERAPY Title — Upper extremity orthotics. Combined motor and peripheral sensory insufficiency: management of spinal cord injury (McKenzie MW — Author et al) (pictorial) Part 4 (3) PHYS — Periodical THER 58:294-303, Mar 78 Volume Page — Date

In the author entries the name(s) of the author(s) up to a maximum of three appears first, followed by the title of the article and then the other bibliographic elements described in the preceding paragraph. "See" references are included for the second and third authors.

Example:

YURA H, FRIESNER A, KING IM ET AL: Curriculum process for developing and revising baccalaureate nursing programs (#15-1700) NLN PUBL: 1-85, 1978

FRIESNER A See: YURA H

To aid those involved in research, all formal research articles, as well as surveys and studies which are tools of research, are indexed under their clinical subject heading with "research," "research, med" or "research, nurs" in parentheses as a descriptive phrase immediately following the title or author.

Example:

Physicians' attitudes toward employment of nurse practitioners (Little M) (research, nurs) Part 1. NURSE PRACTITIONER 3:27-30, Jul/Aug 78

Care studies and illustrated articles are identified by the use of "care st" and "pictorial" in parentheses in the body of the entry.

Example:

Health care for adolescents: Sharon's story (care st) Part 1. JOGN NURS 7:19-20, Jul/Aug 78

The unwed pregnant adolescent: implications for the professional nurse (Petrella JM) Part 2. JOGN NURS 7:22-6, Jul/Aug 78

Geographic subheadings are used only where the content of the article includes significant geographic data or when the historical importance requires geographic identification.

Example:

EMPLOYMENT -- STATISTICS --PHILIPPINE ISLANDS Economic and social welfare of nurses. Supply and demand of nurses (Jereos MC) (research, nurs) Part 2. PHILIPP J NURS 47:3-5, Jan/Mar 78

Full journal titles for the abbreviated titles used in the entries are given in the List of Journals Indexed, in the front of the Index. Following is an added list of ancillary journals from which articles have been selected for inclusion in the supplement or cumulation.

For further helpful suggestions on the use of the INDEX, see the preface to a List of SUBJECT HEADINGS bound with the Annual Cumulation.
